3/LFP cells features:

- High safety, High energy density, Long cycle life, Small volume, Lightweight, and 3 years full warranty

4/LFP Battery Pack System features:

- Customised system to meet different application
- Safe Li-ion technology, no thermal runaway
- Integrated BMS (Battery Management System)
- Battery monitoring and history storage
- Adaptive cells balancing
- Configurable in serial or parallel connection
- Wired communication interface: CAN/TTL/485
- High discharge current capability
- Better performance under low/high temperature
- Capable of over 7000 cycles
- No Cobalt Environmentally friendly and can be recycled.
- Build in fire extinguishing system
- In-time location finding function optional
- Maintenance free
