COMPANY PROFILE

LDC Earthmoving & Equipment Pty Ltd, trading as LDC Equipment, is an ISO9001 accredited manufacturing company, owned and operated here on the Gold Coast. Located at Arundel, LDC Equipment has over 25 employees to design, develop, manufacture, commission and support our standards compliant equipment that we distribute Australia-wide and overseas.

Our purpose-built head office facility incorporates our fabrication and assembly areas, research and development department, engineering and IT and our sales and support network all under the one roof. This allows us to provide technical support to all areas of expertise to our clients in a timely and responsive manner.

LDC has been designing and selling this equipment for over 16 years since its commencement of operation in 2006. We strive to become the industry leader in our field of expertise and pride ourselves on the quality, reliability, functionality, and sustainability.

ABOUT US

LDC Equipment is a leading designer, manufacturer, and distributor of Australian made traffic advisory and control equipment, including. We have more than 27 years' experience in sales, design and manufacturing based.

Our commitment to quality and reliable products and customer service ensures we have a large, loyal client in different sectors. Such as construction, roadworks, traffic control, retail, council, government, mining, business, and more.

KEY BUSINESS AREAS

Technology and Engineering

In-house engineers design & develop our technology to deliver standards compliant equipment. We develop software and hardware, as well as construct circuit boards & components to control and operate our equipment.

Fabrication

Our in-house qualified welders fabricate all of our trailers to an exact standard, ensuring a safe structure to house our electronic equipment, ready to go to work on our roads.

Assembly

An experienced team of assemblers work diligently to our strict OH&S and QC procedures, to deliver our premium equipment on time to our clients.

Service and Spare Parts

As a manufacturer, we always hold spare parts for repairs. Our dedicated team of service personnel provide after sales service and tech support to our valued customers, including a mobile service.
